

Dutch know-how and technology for durable quality

The Dutch horticulture sector is very well renowned and is seen as an innovative industry with high standards of excellence throughout the world. Its know-how and expertise has grown and developed gradually in the past few decades and is now also available to you here in East Africa.

Dutch suppliers and advisors are offering their services to you under the banner of "Green Farming". Green Farming combines Dutch technology and experience with your specific production needs, so that you can rest assured of a totally custom-made product and service package, including on-farm training programs, maintenance and service cycles.
